

Visa Supplier Locator

Find Suppliers Quickly and Easily

The Visa Supplier Locator is an easy-to-use web resource that helps you to quickly and easily locate U.S. suppliers that accept Visa commercial payment products.

You can search for suppliers anywhere in the country by business name or geographic area. You can even search for suppliers based on industry segment (e.g., book stores, computer stores, office supplies), or by specific business enterprise designation, such as minority-owned, woman-owned, or Small Business Administration-registered. The Visa Supplier Locator will display a list of suppliers meeting your search criteria, along with a printable map showing the business location of each supplier.

Identify Enhanced Data Suppliers

The Visa Supplier Locator identifies which suppliers are capable of passing

Level II and Level III enhanced data. Level II data may include sales tax and customer code. Level III data generally includes a detailed accounting of goods and services purchased.

Comprehensive Supplier Database

The Visa Supplier Locator uses the power of the Visa Merchant Profile Database (VMPD), Visa's comprehensive repository of over four million U.S. suppliers that have accepted Visa commercial payment products.

Known for the quality and integrity of its information, the VMPD enhances the efficiency and cost effectiveness of your procurement operations by providing the supplier data needed for corporate and government reporting.

The VMPD also provides socio-economic data needed to demonstrate compliance with government regulations and/or supplier diversity programs.

Visa Supplier Locator Puts the Nation at Your Fingertips

Find Suppliers on the Web

To use the Visa Supplier Locator, open your web browser and go to the Visa Supplier Locator web site at visa.com/supplierlocator. You can save the Visa Supplier Locator as a shortcut or “Favorite” in your web browser for future access.

Flexibility is the Key

The Visa Supplier Locator provides the option of searching either by Supplier Name or by Supplier Address.

You may specify a search radius of either 30-miles or 100-miles. If you do not enter a street address or cross street, the distance to each supplier will be calculated from the *center of the city* you select.

Supplier Name Search

The Supplier Name Search allows you to search using a full or partial business name and geographic location. You must specify the city and state. To pinpoint your search, you may optionally provide a street address and/or cross street.

For example, by entering the word “Office” in the Name Search, you will get a list of all suppliers in your area whose name contains “Office” (e.g., “American Office Supply” or “Office Supply Central”).

Supplier Address Search

The Supplier Address Search can be used to locate suppliers based on geographic location and industry segment (e.g., book stores, office supplies). You must

specify the city, state, and industry segment. To pinpoint your search, you may optionally specify a street address and/or cross street.

With the Supplier Address Search, you may further qualify your search with any of the following criteria:

- ◆ Business Enterprise designation (e.g., minority-owned, woman-owned, veteran-owned, Small Business Administration-registered). This information is helpful if you are trying to demonstrate compliance with government regulations and/or supplier diversity programs.
- ◆ Enhanced Data Level, indicating suppliers that are capable of sending Level II and/or Level III enhanced data.

Viewing the Results

When your search is complete, the Visa Supplier Locator will display a list of all the businesses that match your search criteria (see the Sample Search Results below). Each business profile may include:

- ◆ Business name
- ◆ Street address, city, state, and ZIP code
- ◆ Area code and telephone number
- ◆ Distance in miles from your location (or from the center of the city)
- ◆ Business Enterprise designation(s)
- ◆ Level II Indicator
- ◆ Level III Indicator

By clicking on the number to the left of the Business Name, you can display a printable map showing the location of the supplier.
